Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Small Business and Special Surveys Division

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9045) or to the Statistics Canada reference centre in:

Notes

Data are shown by quartiles when at least 13 of the sampled businesses report the specific item.

Records were ranked in ascending order according to sales size. Each quartile (i.e. bottom 25%, lower middle 25%, etc.) represents one quarter of the total number of businesses. Within each quartile, the average ratio is presented. For comparison purposes, the high and low values of sales are shown.

Selected Publications Relating to Small Business

Highlights

NEWFOUNDLAND

- The number of small businesses in the 28 industries profiled rose from 3,500 businesses in 1982 to 4,500 in 1985, which represents a 29% increase.
- The largest absolute increase in small businesses, 160, occurred in the Single Family Housing Contractors Industry, which rose from 110 businesses in 1982 to 270 in 1985.
- The profit margin ratios ranged from 0.3% in the Take-Out Food Services Industry to slightly over 38% in the Barber and Beauty Shops Industry.
- Payrolls generated by small businesses in these industries increased 28%, from \$133 million in 1982 to \$170 million in 1985.
- Employment in businesses with less than 20 employees increased 11%, from 11,400 average labour units in 1982 to 12,600 in 1985. The largest increase, 83 average labour units, occurred in the Pharmacies Industry.

Digitized by the Internet Archive in 2024 with funding from University of Toronto

Introduction and Data Sources

This publication is one of a series representing industry profiles of small businesses. Other reports currently available from the Small Business and Special Surveys Program are listed in Appendix A under the title **Selected Publications Relating to Small Business.** The data contained in this report are the result of a joint project of Statistics Canada, the Department of Regional Industrial Expansion and all provincial and territorial departments responsible for small businesses.

Returns submitted to Revenue Canada Taxation for the year 1985 were used to derive the information shown in this bulletin. The statistics were compiled from only those businesses reporting sales of between \$10 thousand and \$2 million. The choice of this particular size range was largely driven by operational considerations and does not represent an official definition of what constitutes a small business.

Data pertaining to businesses in tables 1, 2, 3, and 6 are drawn from a statistical sample of taxation records of corporations and unincorporated sole proprietorships and partnerships. The tables are on a fiscal year basis. Data for table 4 are derived from incorporated businesses only. Corporate data in this report are derived from tax returns, which typically consist of a T2 form, a set of financial statements and other supportive schedules. Similarly unincorporated business tax returns which report self-employment income typically consists of a T1 (General) form, a set of financial statements and other supportive schedules. Table 5 is derived from the T4 form which consists of a summary of wages and salaries, and is on a calendar year basis.

The 34 industry groups selected for publication are those most densely populated by small businesses. These groups represent approximately 50% of small businesses, the remaining 50% being distributed over approximately 800 other industry classifications. Our coverage will expand annually until the taxation year 1987 (available in 1989) when over 100 industry groups representing nearly 75% of Canada's small businesses will be profiled.

METHODOLOGY

Records selected for this study have been ranked in ascending order of sales within an industry and province and divided into four equal parts (quartiles) so that each part (quartile) includes one quarter of the total number of businesses in a given industry. Within each of these quartiles we have displayed the lowest and the highest sales values reported.

Estimated data published for tables 1, 2, 3 and 6 are derived from a statistical sample of approximately 20,000 small businesses distributed amongst 34 industry groups. For example, the number of observations in the sample for the trucking industry range from a high of 748 businesses in Ontario to a low of 18 in the Northwest Territories. Where the sample size of a given industry group is less than 20 businesses, the distribution into quartiles has not been done because of lack of statistical representativeness. In such circumstances, only the total values are published. Furthermore, for quality assurance reasons, a variable reported by less than 13 businesses is not distributed into quartiles.

Estimates published in table 4 are derived from a random sample of approximately 10,000 incorporated businesses selected from the same 34 Standard Industrial Classification groups (SIC).

a) Table 1

This table shows the average ratio of selected expenses items to sales for a) all businesses in the industry and, b) for only those businesses reporting the expense item. It is important to note that in the case of b) each expense ratio shown is independent of any other ratio because the numerator and denominator of the ratio calculation includes only those businesses reporting the particular expense. For example, some small businesses own the building from which they operate and may declare mortgage expenses while others in the same group may not own their business premises and incurrent rather than mortgage as an expense.

b) Table 2

This table displays the average values of selected asset, liability and equity items for all businesses. Columns may be summarized using the accounting equation ASSETS - LIABILITIES = EQUITY (the total may not be exact due to rounding).

c) Table 3

Table 3 presents some of the more commonly used financial and operating ratios. The figures which make up these ratios have been extracted from Table 2 (except for interest expense) and the ratios represent the average of ratios for each business in the group.

Introduction and Data Sources - concluded

Definitions

1. Liquidity Ratio

Current = <u>current assets</u>

2. Leverage Ratios

Debt/Equity = total liabilities

equity

total liabilities

total assets

d) Table 4

Debt Ratio

Table 4 shows the source and application of funds and the subsequent change in working capital. Values shown are averages for all businesses and columns are additive. This table is limited to incorporated businesses only.

Interest Coverage

net profit + interest expense

interest expense

e) Table 5

The data in this table are derived from the payroll records of employers and apply to all employees who are issued T4 tax records. Employees earning less than \$500 a year may be excluded as this is the cutoff for the mandatory issuance of T4 tax records.

Due to the annual nature of the data source, we assume that both newly reporting businesses and no longer reporting businesses have been in activity for six months. As a result, their estimated average labour units (ALUs) are assumed to be twice their actual ALUs (i.e. annualized).

f) Table 6

This table shows the distribution of businesses reporting a profit or a loss in an industry from 1982 through 1985. The businesses identified in this table are the same as those in Tables 1 to 3.

How to Use the Tables

The profiles are comprised of six tables. Each table (except Table 5) displays data in quartiles based on sales.

To use the tables:

- 1) Select the industry and/or province of interest to you (See Table of Contents).
- 2) Locate the appropriate sales range that is displayed on the two lines entitled "Low Sales Value" and "High Sales Value".
- 3) The selected range will indicate the proper quartile, i.e. the bottom 25%, the lower middle 25%, the upper middle 25% or the top 25%.
- 4) All data pertaining to the selected business will be in that column.

For example:

Let us take a plumbing business in Canada with sales of \$50,000.

- 1) Select the table entitled "Plumbing Contractors (SIC 4241)".
- 2) Sales of \$50,000 is in the range of \$37,000 to \$90,000 ("Low Sales" and "High Sales" values).
- 3) Thus, sales of \$50,000 are in the lower middle 25% quartile.
- 4) All relevant data pertaining to this plumbing business with sales of \$50,000 are in this quartile for Tables 1 to 4 and Table 6.

Note:

One can note that wages and salaries expense in the plumbing industry range from 10% of sales in the lowest quartile to 26% in the highest quartile. Such variations may illustrate how some expenses vary in proportion to sales.

This comparison by quartile is applicable to Tables 1 to 4 and Table 6.

Table 5 contains employment data for the years 1982 and 1985 and shows the changes in the industry over this time period. The data comprised in this table are cross-sectional.

Standard Industrial Classification - Definition

The SIC for each industry is described at the end of Table 1.

Total weighted sales of all businesses in the sample

Total weighted sales of businesses reporting this item of expenditure

Since the number of businesses reporting a specific expense may differ for each cell, the total (profit (loss) plus expenses) does not necessarily equal 100%. See Notes on Symbols Page.

Standard Industrial Classification Definition:

SIC 6012 - Specialty Food Stores

Businesses primarily engaged in retail dealing usually in one line of food. Included in this industry are those retail bakeries which sell mainly purchased goods and shops which bake their products on the premises and sell them over-the-counter to final consumers. Businesses primarily engaged in selling fried chicken, loughnuts, pizzas, soft ice cream and the like for off-oremises consumption are classified in 9213 -- Take-Out Food Services. This group includes the following types of stores: bread and pastry shops, butcher shops, candy and nut stores, confectionery stores, dairy products stores, delicatessens, fish and seafood stores, fruit and vegetables stores, health food stores, ice cream stores, milk stores, specialty food stores (exc. Take-Out Food Services).

x 100 for each quartile (2) Value in each cell Total weighted expenditure on a given item

⁽³⁾ Value in each cell Total weighted expenditure on a given item x 100 for each quartile

Employment Changes by Size of Business Showing Total Annual Payroll, Average Labour Units and Changes in Number of Businesses, 1982 and 1985 TABLE 5. Newfoundland, Food Stores (SIC 601)

				Changes in number of businesses with paid employees		
Business size expressed in average labour units(1)	Number of Businesses	Total payroll (\$000's)	Average labour units(1)	Newly reporting(2)	No longer reporting(3)	
1982						
Total	895	46,735	4.518	180	118	
less than 20 20 - 99 100 - 499 500 and over	866 20 4 5	19.777 8.524 3.612 14.822	1,931 846 357 1,384	178 1 1	118 - -	
1985						
Total	993	54,991	4.951	119		
less than 20 20 - 99 100 - 499 500 and over	952 28 7 6	24.760 9.348 10.146 10.737	2.234 857 929 931	114 4		

⁽¹⁾ Average labour units are calculated by dividing total payroll by the average annual wage and salary rate as reported in the Survey of Employment. Payroll and Hours, Statistics Canada, Catalogue No. 72-002. An average labour unit could be interpreted as a full-time employee. Note that the business size groups used are determined at the Canada level. Thus if a business has at least 500 employees in Canada as a whole but less than that number in any given province it is shown in the 500 and over group
(2) Refers to businesses reporting no payroll deductions in the previous year

⁽³⁾ Refers to businesses reporting no payroll deductions in the following year

x 100 for each quartile (2) Value in each cell Total weighted expenditure on a given item

Total weighted sales of all businesses in the sample

(3) Value in each cell Total weighted expenditure on a given item x 100 for each quartile

Total weighted sales of businesses reporting this item of expenditure

Since the number of businesses reporting a specific expense may differ for each cell, the total (profit (loss) plus expenses) does not necessarily equal 100%. See Notes on Symbols Page.

Standard Industrial Classification Definition:

SIC 6031 - Pharmacies

Businesses primarily engaged in retail dealing in drugs, pharmaceuticals and patent medicines and drug sundries. Prescribed medicines must be sold but are not necessarily the source of greatest revenue. They may be secondarily engaged in selling other lines such as cosmetics, toiletries, tobacco products, confectionery, giftware and novelty merchandise

TABLE 5. Employment Changes by Size of Business Showing Total Annual Payroll, Average Labour Units and Changes in Number of Businesses, 1982 and 1985

Newfoundland, Fabric and Yarn Stores (SIC 6151)

Changes in number of businesses with paid employees Average Newly No longer Total Number Business size expressed in reporting(2) reporting(3) labour payroll average labour units(1) units(1) Businesses (\$000's) 1982 55 2 2 17 564 Total 50 16 less than 20 20 - 99 5 X X 100 - 499 500 and over 1985 53 2 612 18 Total 48 2 less than 20 5 20 - 99 100 - 499 500 and over

⁽¹⁾ Average labour units are calculated by dividing total payroll by the average annual wage and salary rate as reported in the Survey of Employment, Payroll and Hours, Statistics Canada, Catalogue No. 72-002. An average labour unit could be interpreted as a full-time employee. Note that the business size groups used are determined at the Canada level. Thus if a business has at least 500 employees in Canada as a whole but less than that number in any given province it is shown in the 500 and over group

⁽²⁾ Refers to businesses reporting no payroll deductions in the previous year

⁽³⁾ Refers to businesses reporting no payroll deductions in the following year

TABLE 5. Employment Changes by Size of Business Showing Total Annual Payroll, Average Labour Units and Changes in Number of Businesses, 1982 and 1985

Newfoundland, Gasoline Service Stations (SIC 6331)

				Changes in number of businesses with paid employees	
Business size expressed in average labour units(1)	Number of Businesses	Total payroll (\$000 s)	Average labour units(1)	Newly reporting(2)	No longer reporting(3)
1982					
Total	365	16,395	1.689	51	34
less than 20 20 - 99 100 - 499 500 and over	357 5 - 3	14 584 1,278 - 533	1,504 133 - 52	51 - -	32 2 -
1985					
Total	370	19,001	1,704	45	
less than 20 20 - 99 100 - 499 500 and over	363 6 - X	17.058 X - X	1.528 148 - 28	44 1	

⁽¹⁾ Average labour units are calculated by dividing total payroll by the average annual wage and salary rate as reported in the Survey of Employment. Payroll and Hours, Statistics Canada, Catalogue No. 72-002. An average labour unit could be interpreted as a full-time employee. Note that the business size groups used are determined at the Canada level. Thus if a business has at least 500 employees in Canada as a whole out less than that number in any given province it is shown in the 500 and over group.

⁽²⁾ Refers to businesses reporting no payroll deductions in the previous year

⁽³⁾ Refers to businesses reporting no payroll deductions in the following year

(1) These estimates are based on a sample of businesses reporting sales between \$10 thousand and \$2 million

x 100 for each quartile (2) Value in each cell Total weighted expenditure on a given item

Total weighted sales of all businesses in the sample

Total weighted expenditure on a given item x 100 for each quartile

Total weighted sales of businesses reporting this item of expenditure

Since the number of businesses reporting a specific expense may differ for each cell, the total (profit (loss) plus expenses) does not necessarily equal 100%. See Notes on Symbols Page

Standard Industrial Classification Definition:

(3) Value in each cell

SIC 6342 - Tire, Battery, Parts and Accessories Stores
Businesses primarily engaged in retail dealing in new or used tires, tubes patteries and other automobile parts and accessories separately or a componance. These businesses may be secondarily engaged in tire installation and repair as well as in automobile repair. This industry includes the following types of retail operations: retail automotive batteries, retail automotive parts and accessories, retail automotive cassettes and 8-track tape recorders, retail motor vehicle radios (inc. C.B. or GRS), retail motor vehicle stereos, retail motor vehicle tape decks and retail tires and tubes

⁽¹⁾ These estimates are based on a sample of businesses reporting sales between \$10 thousand and \$2 million

Since the number of businesses reporting a specific expense may differ for each cell, the total (profit (loss) plus expenses) does not necessarily equal 100% See Notes on Symbols Page.

Standard Industrial Classification Definition:

SIC 6412 - General Stores

Businesses primarily engaged in retail dealing in a general line of merchandise on a non-departmental basis, the most important of which is food. Other merchandise sold usually includes ready-to-wear apparer, folletines, cosmetics, hardware, farm supplies and housewares. Businesses may be described as country general stores and general stores

⁽²⁾ Value in each cell = Total weighted expenditure on a given item x 100 for each quartile Total weighted sales of all businesses in the sample

Total weighted expenditure on a given item (3) Value in each cell

x 100 for each quartile

Total weighted sales of businesses reporting this item of expenditure

⁽¹⁾ These estimates are based on a sample of businesses reporting sales between \$10 thousand and \$2 million

(2) Value in each cell

Total weighted expenditure on a given item x 100 for each quartile

Total weighted sales of all businesses in the sample

(3) Value in each cell

Total weighted expenditure on a given item

x 100 for each quartile

Total weighted sales of businesses reporting this item of expenditure

Since the number of businesses reporting a specific expense may differ for each cell, the total (profit (loss) plus expenses) does not necessarily equal 100%. See Notes on Symbols Page.

Standard Industrial Classification Definition:

SIC 7512 - Operators of Non-Residential Buildings
Businesses primarily engaged in operating, or owning and operating buildings and dwellings such as arena operating, conference convention centre operating, leasing non-residential buildings, meeting hall operating, office building rental real estate operating - non-residential buildings shooping centre operating, stadium operating and theatre building operating

(2) Value in each cell

Total weighted expenditure on a given item

x 100 for each quartile

Total weighted sales of businesses reporting this item of expenditure

Since the number of businesses reporting a specific expense may differ for each cell, the total (profit (loss) plus expenses) does not necessarily equal 100%. See Notes on Symbols Page.

Standard Industrial Classification Definition:

Businesses primarily engaged in providing short term accommodation to the public with or without food, beverage and other services. Those firms with six or more notel or motel hotel-type rooms are classified here regardless of the major source of revenue. A notel-type room has access poly from the interior of the building and a motel hotel-type room has access from both the interior and exterior.

⁽¹⁾ These estimates are based on a sample of businesses reporting sales between \$10 thousand and \$2 million

(2) Value in each cell = Total weighted expenditure on a given item x 100 for each quartile

Total weighted sales of all businesses in the sample

(3) Value in each cell Total weighted expenditure on a given item x 100 for each quartile

Total weighted sales of businesses reporting this item of expenditure

Since the number of businesses reporting a specific expense may differ for each cell, the total (profit (loss) plus expenses) does not necessarily equal 100°: See Notes on Symbols Page

Standard Industrial Classification Definition:

SIC 9211 & 9212 - Licensed and Unlicensed Restaurants
Businesses primarily engaged in preparing and serving meals for consumption on the premises either licensed or unlicensed to serve alcoholic beverages

TABLE 5. Employment Changes by Size of Business Showing Total Annual Payroll, Average Labour Units and Changes in Number of Businesses, 1982 and 1985

Newfoundland, Food Services (SIC 921)

Business size expressed in average labour units(1)				Changes in number of businesses with paid emoloyees		
	Number Total of payroll Businesses (\$000's)		Average labour units(1)	Newly reporting(2)	No longer reporting(3)	
1982						
Total	609	33,838	3,892	130	57	
less than 20 20 - 99 100 - 499 500 and over	564 36 4 5	13,643 8.997 2.491 8.707	1,569 1,035 286 1,002	120 8 1	53 3 1	
1985						
, Total	597	43,116	4,580	97	***	
less than 20 20 - 99 100 - 499 500 and over	549 37 6 5	14.705 10.327 8,019 10,065	1,562 1,097 852 1,069	90 6 - 1		

⁽¹⁾ Average labour units are calculated by dividing total payroll by the average annual wage and salary rate as reported in the Survey of Employment Payroll and Hours, Statistics Canada, Catalogue No. 72-002. An average labour unit could be interpreted as a full-time employee. Note that the pusiness size groups used are determined at the Canada level. Thus if a business has at least 500 employees in Canada as a whole but less than that number in any given province it is shown in the 500 and over group.

⁽²⁾ Refers to businesses reporting no payroll deductions in the previous year

⁽³⁾ Refers to businesses reporting no payroll deductions in the following year

Total weighted sales of all businesses in the sample

Total weighted sales of businesses reporting this item of expenditure

Since the number of businesses reporting a specific expense may differ for each cell, the total (profit (loss) plus expenses) does not necessarily equal 100°. See Notes on Symbols Page.

Standard Industrial Classification Definition:

SIC 9953 - Janitorial Services
Businesses primarily engaged in cleaning and maintenance of buildings and dwellings such as char service, floor waxing, janitorial services, janitorial maintenance of buildings and dwellings and office cleaning

⁽²⁾ Value in each cell = Total weighted expenditure on a given item x 100 for each quartile

x 100 for each quartile (3) Value in each cell · = Total weighted expenditure on a given item

Employment Changes by Size of Business Showing Total Annual Payroll, Average Labour Units and Changes in Number of Businesses, 1982 and 1985 TABLE 5.

Newfoundland, Services to Buildings and Dwellings (SIC 995)

					Changes in number of businesses with paid employees	
Business size expressed in average labour units(1)	Number of Businesses		Total payroll (\$000's)	Average labour units(1)	Newly reporting(2)	No longer reporting(3)
1982						
Total	77		9.764	1,049	11	13
less than 20	61		1.647	171	11	13
20 - 99	12		3,703	401		
100 - 499	X		X	167		
500 and over	X		X	310	·	·
1985						
Total	90		7,829	793	14	
less than 20	73		2,348	216	12	
20 - 99	14		4,415	465	1	
100 - 499	•				*	
500 and over	3		1.066	112	1	

⁽¹⁾ Average labour units are calculated by dividing total payroll by the average annual wage and salary rate as reported in the Survey of Employment, Payroll and Hours, Statistics Canada, Catalogue No. 72-002. An average labour unit could be interpreted as a full-time employee. Note that the business size groups used are determined at the Canada level. Thus if a business has at least 500 employees in Canada as a whole but less than that number in any given province it is shown in the 500 and over group

(2) Refers to businesses reporting no payroll deductions in the previous year

⁽³⁾ Refers to businesses reporting no payroll deductions in the following year
